Rental Filtration Equipment FUNDABAC® | CONTIBAC®

Efficient solutions for small-scale testing and validation

This is DrM

Customized solutions

Each solid-liquid separation system is tailor made to the specific application parameters of our clients. We view every application as a challenge to satisfy our clients, regardless if the application is straight forward or complex.

Application comprehension

Every solid-liquid separation application is unique. DrM's comprehension of all of the applications begins with a discussion with the client and is followed by a request that the client complete an application questionnaire to the best of its ability. Following a review of the information submitted by the client, DrM application specialists may suggest that onsite testing and/or piloting be carried out. This hands-on work ultimately gives both DrM and its clients the confidence that the process is scalable. It also puts DrM in a position to submit a technical/commercial proposal that it will stand behind.

Quality above all

DrM's Quality System is ISO 9001 certified for the design and manufacture plants. We are dedicated to continually improving the efficiency and the effectiveness of our quality management system. All of our products follow a rigid quality control program that employs the most current testing and inspection methods prior to shipment.

Filtration Options

During selection, sizing and validation of process equipment laboratory and pilot testing are indispensable bench tools. In filtration processes they provide important data on flow, pressure, filtrate quality, residual moisture, washing yield, filter aid demand and other parameters. The insight gained serves the process engineer and plant designer for sound planning and specification of the full-scale production equipment. After the execution of significant pilot tests the determination of a performance or process guarantee is normally possible.

Rental filtration equipment type FUNDABAC® & CONTIBAC® are available in various sizes from laboratory and pilot scale up to industrial production.

COALE		FILTER E	MODE OF	
SCALE FILTER ARE	FILTER AREA (m²)	SIZE (mm)	QUANTITY	OPERATION
Laboratory	0.012-0.048	Ø 30 ⁽¹⁾	1	manual
Pilot Unit	0.16-0.32	Ø 75 ⁽²⁾	1	manual / automatic
Semi Industrial	1.0-3.0	Ø 75 ⁽²⁾	4-7	manual / automatic
Production	4.5-50	Ø 75 ⁽²⁾	14-78	automatic

^{(1) 1:2.5} reduced FUNDABAC® Filter element

Besides stainless steel (316L) various plastics (PP, PVDF) as well as corrosion resistant coatings are available as materials of construction. Normally the units are fitted with heating jackets as well as heel volume filtration (HVF) devices. Most of the units can be operated as CONTIBAC® thickeners alternatively when assembling the conical bottom. A suitable feed pump can be supplied for the majority of the units, if desired.

The rental equipment complies with applicable pressure equipment directives and is certified accordingly (PED, ASME). Various plants are available with ATEX approval for use in a potentially explosive atmosphere.

Unit Specifications

CRITERIA		LAB FILTER TSD	MONO-CANDLE TEST FILTER	MULTI-CANDLE TEST FILTER	MULTI-CANDLE PRODUCTION FILTER
Duty / Scale		Laboratory	Pilot testing	Semi industrial / Small batch	Industrial / Production

Units options

LABORATORY FILTER TSD	SS 316L	PVDF	
Equipment No. APN	several		
Filter Area (m²)	0.012		
Vessel Ø (mm)	80		
Max. Pressure (barg)	-1 / 20	5	
Max. Temperature (°C)	250	80	
Material	SS 316L	PVDF	
Dimensions (mm)	460 x 500 x 220		
Weight (kg)	10.7	7.3	

PILOT FILTER FUNDABAC® MONO MANUAL		
Equipment No. APN	several	
Filter Area (m²)	0.16-0.32	
Vessel Ø (mm)	140-220	
Max. Pressure (barg)	6-10	
Max. Temperature (°C)	100-200	
Material	SS 316L, PP	
Dimensions (mm)	1770 X 970 X 2210	
Weight (kg)	400	

PILOT FILTER FUNDABAC® MONO AUTOMATIC		
Equipment No. APN	several	
Filter Area (m²)	0.16-0.32	
Vessel Ø (mm)	150-220	
Max. Pressure (barg)	6-10	
Max. Temperature (°C)	100-200	
Material	SS 316L, PVDF	
Dimensions (mm)	on demand	
Weight (kg)	670	

PILOT FILTER FUNDABAC® QUATTRO AUTOMATIC			
Equipment No. APN	52919, 53017		
Filter Area (m²)	1.0, 1.2		
Vessel Ø (mm)	400, 508		
Max. Pressure (barg)	10		
Max. Temperature (°C)	120, 80		
Material	SS 316L, HRL		
Dimensions (mm)	2100 x 970 x 2210, 1810 x 1710 x 3150		
Weight (kg)	650, 1400		

PILOT FILTER FUNDABAC® HEPTA AUTOMATIC		
Equipment No. APN	several	
Filter Area (m²)	2.3-50.7	
Vessel Ø (mm)	500-1600	
Max. Pressure (barg)	6-10	
Max. Temperature (°C)	100-200	
Material	SS 316L	
Dimensions (mm)	on demand	
Weight (kg)	1100-11000	

PILOT FILTER CONTIBAC® RX AUTOMATIC SS		
Equipment No. APN	several	
Filter Area (m²)	1-3	
Vessel Ø (mm)	323.9	
Max. Pressure (barg)	6.5-7.5	
Max. Temperature (°C)	80	
Material	SS 316L	
Dimensions (mm)	on demand	
Weight (kg)	355-940
